Web Site:

Instructions:

This manual is used as a template in developing your IATF 16949:2016 Automotive Quality Management System.

- Methods and systems used in the development and operation of the QMS vary widely from company to company.
- The blue text and suggestions displayed in the manual are intended to offer some options and to highlight the areas that need attention / update / replacement.
- Review the text and suggestions and at a minimum replace or update them to reflect the unique / customized information of your quality system requirements.
- Delete the blue text after each task is completed.
- Use replace function – enter “Your Company” in find space, enter your company name in replace space – system should make changes throughout the entire document.
- Additional details and instructions in the use of the QM-016 manual template are included in a separate file “QMS-Template-Instructions”.

Additional documentation review.

- Similarly, the blue text and suggestions displayed in the QMS documentation (that will follow) for the procedures, instructions, attachments, forms, and flow diagrams are intended to offer some options and to highlight the areas that require update or replacement.

Table of Contents – (this page)

Introduction

Section A Scope of the Quality Management System

Section B References

a. Normative Reference

b. Terms and Definitions

Quality Management System Requirements

Section C Document Information

a. Distribution Control List

b. Revision Status

c. Quality Policy, Quality Objective, Strategic Direction, Corporate Policies

d. [Organization Chart](#)

e. [Company Background - Products and Services](#)

f. [Process Flow Diagram](#)

Section D List of Documented Information for the IATF standard clauses 4 through 10

Clause 4 Context of the Organization

Clause 5 Leadership

Clause 6 Planning

Clause 7 Support

Clause 8 Operation

Clause 9 Performance Evaluation

Clause 10 Improvement

Sections E, F, G, etc. Spares

Section R Records Documentation Matrix

Control of Documented Information

1.0 Purpose/Scope

- 1.1 This procedure describes the quality management system (QMS) processes for ensuring control of the initial release and changes to the documented information essential for the production or services provided by [Your Company](#).
- 1.2 The procedure applies to all documented information essential to the product or service and to the procedures defined as essential to the operation of the QMS.

2.0 Responsibilities and Authorities

- 2.1 The [Quality manager / Quality team leader / Management representative](#) has the prime responsibility and approval authority for this procedure.
- 2.2 In support of the [Quality manager](#), the [Quality team / ISO steering committee](#) is responsible to ensure that personnel have access to and are aware of relevant QMS documentation and changes.
- 2.3 Additional responsibilities for the document owner, [the document control coordinator, department managers, engineers, employees, and the Management rep](#) are detailed in relevant paragraphs of section 5.0 below.

3.0 References and Definitions

- 3.1 References.
- 3.1.1 This document addresses clause 7.5 of the IATF 16949:2016 standard covering, Documented information.
- 3.1.2 QM-016 Quality Manual.
- 3.2 The documented information collectively describes the QMS where a typical pyramid-shape documentation structure provides for:
- Tier I - Manual
 - Tier II - Procedures (P-xxx)
 - Tier III - Work Instructions (WI)
 - Tier IV - Quality Records
- 3.3 Definitions: Definitions related to this procedure are provided in the document numbering instruction WI-750-001.

4.0 Resources

- 4.1 None, ([unless an electronic document control system is used](#)).

5.0 Instructions

- 5.1 The QMS includes the documented information required by the IATF 16949:2016 international standard and the documented information determined to be necessary for an effective QMS.

Release of Products and Services

1.0 Purpose/Scope

- 1.1 The purpose of this procedure is to describe the system that provides controlled conditions under which the production processes are performed at [Your Company](#).
- 1.2 The procedure applies to the release of products and services.

2.0 Responsibilities and Authorities

- 2.1 The [Quality manager](#) has the prime responsibility and approval authority for this procedure.
- 2.2 In support of the [Quality manager](#), the [Quality team / ISO steering committee](#) is responsible to ensure that processes are performed under controlled conditions.
- 2.3 Additional responsibilities for the [Quality manager / quality team](#) are detailed in relevant paragraphs of section 5.0 below.

3.0 References and Definitions

- 3.1 References: This document relates to clause 8.6 of the IATF 16949:2016 standard, covering release of products and services.
- 3.2 Definition: Production processes: Processes that contribute or result in the product or service being produced or the product or service being provided.

4.0 Resources

- 4.1 [As listed in the applicable production documentation](#).

5.0 Instructions

- 5.1 In support of the procedure P-851 for control of production and service provision, this procedure addresses the control of changes and the post-delivery activities.
- 5.1.1 The [Quality team / ISO steering committee](#) ensures that systems are implemented under controlled conditions.
- The documented information for production and service provision are included in the QMS-Process identification worksheet, F-440-001.
- 5.2 A suitable infrastructure and process environment include manufacturing equipment where production processes are controlled and managed to achieve product conformance and continual improvement.
- 5.3 Release of products and services is performed after the verification activities at the appropriate stages ensure that [product and service](#) requirements are met. [An example of a typical inspection report, form F-910-004 can document results](#).
- 5.3.1 Product release criteria and product release authority are documented on

-
- 5.1.3 Executive Management may require that the performance of certain processes be monitored using statistical techniques to ensure the required level of performance.
 - 5.1.4 Statistical Techniques may be applied, as necessary, to the following:
 - Control of process performance.
 - Corrective and preventive action analysis and effectiveness.
 - Customer complaints.
 - Customer perception survey feedback.
 - Establishment of sampling plans for inspection and testing.
 - Evaluation of non-conformance defect categories.
 - Evaluation of the measurement system.
 - Set up of process equipment.
 - Testing and validation of processes.
 - Testing and validation of produce / service designs.
 - Any other company wide situations that require statistical monitoring.
 - 5.2 Statistical Sampling.
 - 5.2.1 When specified, statistical sampling is used for new product or service design, verification of those designs, incoming inspection, in-process inspection, and final inspection.
 - 5.2.2 The sampling plan to be used for an inspection is documented in the inspection instruction. Where a sampling plan has not been defined, the sampling defaults to C = 0 Sampling Plans.
 - 5.2.3 For attribute data sampling, the acceptable level is zero defects.
 - 5.3 Review of Sampling Methods.
 - 5.3.1 The Management Representative regularly evaluates the suitability and effectiveness of the sampling methods that have been utilized. The evaluation is performed by analyzing trends in product nonconformances, audit findings, customer survey perception feedback, customer complaints and other various feedback information.
 - 5.3.2 If the sampling plans are not effective, they are modified to improve their effectiveness. Regular evaluations may also determine that the statistical techniques in use are no longer of any value and the recommendation to discontinue or modify, would be made.
 - 5.4 Analysis and use of data.
 - 5.4.1 Quality and operational performance trends are compared with progress toward objectives and results in actions to support:
 - Development of priorities for prompt resolution of customer-related problems.
 - Determination of key customer-related trends and correlation to aid in status review, decision making and longer term planning.
 - An information system for timely reporting of product information resulting from actual use.
 - 5.4.2 A method of analysis is provided with procedure P-913 for root cause analysis.

6.0 Forms and Documented Information

- 6.1 F-911-001 Frequency Distribution Report
- 6.2 P-720 Competence and awareness
- 6.3 P-910 Monitoring, measuring, analysis, and evaluation
- 6.4 P-913 Root cause analysis
- 6.5 List the forms that you have referred to above. These forms, charts and summaries may be system generated and are typically standard and are controlled.
 - Assign form control numbers such as F-911-001 for the Frequency Distribution Report.
 - List records that must be maintained and add them to the Quality Records Table.
 - Reference input and output requirements for management review meetings.

7.0 Opportunities and Risks

- 7.1 The planning procedure P-600 for Planning for the Quality management system addresses opportunities and risks (risk-based thinking).
- 7.2 As applicable to your company, make use of your organizational knowledge, lessons learned and experience with the activities associated with **Statistical techniques** to determine the opportunities and risk that need to be addressed and that can:
 - Give assurance that the procedure can achieve its intended result(s).
 - Enhance desirable effects, and prevent or reduce undesired effects.
 - Achieve improvement.

8.0 Revision History

Comment and Suggestion Report

Instructions

- You are encouraged to make comments and/or suggestions for the improvement to the QMS known to your supervisor.
- Use the form below to communicate your suggestions and/or comments to ensure are noticed so that prompt reporting and subsequent timely improvement actions can be initiated.
- Your inputs can be reported by filling out this simple form [available at the ISO bulletin boards](#).
- Your inputs can be reported verbally, in which case, your supervisor fills out the form below.
- Thank you; we appreciated your help and efforts in improving our quality performance.

QMS Comment and Suggestion Form

Document Revision Checklist

Document Name:		Document Number:	
Changes	Revision approved by supervisor and plant quality control		
	Accept previous changes		
	Update header to current date		
	Date all attachments (new or changes only)		
	Update page numbering		
	Make new changes using revision tool		
	Run spell check		
	Reprint original (white paper), including all attachments		
	Password protect document		
Master List	Update document information in the master list including date, records, attachments, related documents and references.		
	If form, attachment or reference changes, search master lists for other affected documents and issue a document change request form. New references require number identification.		
	If there are related documents, check to see if review or changes are indicated.		
Training	a) Determine level of training required with supervisor (NN, RQ, EM)		
	b) Update training summary date of revision and level of training required for the revision		
	c) Check training summary for list of individuals trained on the document		
	d) For required training send change memo to supervisor listing individuals to be trained		
	e) For employee training send memo to manager or supervisor in charge of employee training		
Approval	Give new original and attachments to supervisor and quality control to sign		
Distribution	a) Check distribution summary for listing of controlled copies		
	b) Copy onto controlled paper.		
	c) Remove obsolete master copy and stamp it "Obsolete". Attach change request and file in the "Obsolete" binders.		
	d) File new original in master binder		
	e) Distribute controlled copies as indicated by controlled copy list.		
	f) Remove & discard obsolete controlled copies.

IATF 16949:2016 Automotive Quality Management Systems - The Basic Gap Analysis Checklist

This gap analysis checklist is prepared for use in evaluating a Quality Management System (QMS) against the requirements of the new Automotive standard. The IATF 16949:2016 standard includes the requirements of ISO 9001:2015 and specifies additional automotive industry requirements.

In the checklist, each requirement is expressed as a question that the user (auditor / assessor) can use to evaluate your QMS capabilities. Because the automotive standard refers to ISO 9001:2015 for many of the requirements, you will need to have copies of the IATF 16949:2016 and ISO 9001:2015 standards to use along with this checklist so that, if required, you can refer to the requirements.

The intent of the main clauses of the new standard is summarized in **blue font**, and additional information is provided for the IATF 16949:2016 to supplement the intent of ISO 9001:2015.

Blue font summarizes the new standard

After you have prepared an audit schedule, and assigned responsibility to your auditors for different areas or processes to audit, copy each section of the checklist for the auditors working with that section. As you work through the checklist take notes on what is in place, and what needs to be developed.

In the space for 'currently in place', list or reference the procedures or other documents, or evidence that you have reviewed and that will provide information for the new QMS. Take notes on the status of the documents, that is, will they need to be revised for the new system, or can they be used as is? Also, note where processes are in place, but documentation is needed. Focus on what is in place, and what needs to be developed.

While you do want to know if documented information is in place and if procedures and processes are being complied with, compliance is not your focus for this audit. Remember that the outcome of this audit should be a list of things that your company needs to do to comply with the IATF 16949:2016 standard.

---	QUALITY MANAGEMENT SYSTEM	Currently in Place	Compliant Yes / No	If No - % Completed	Items Needed
4	CONTEXT OF THE ORGANIZATION				
<p>For ISO 9001:2015, this clause introduces two sub-clauses relating to the context of the organization, (1) understanding the organization and its context and (2) understanding the needs and expectations of interested parties. Together they require that you determine the issues and requirements that can impact on the planning of the QMS. In addition, the scope of the QMS and the QMS processes along with their applicability and interactions need to be determined.</p> <p>For IATF 16949:2016, sections are introduced to supplement requirements for the scope of the QMS, customer specific requirements, conformance of products and processes, and product safety.</p>

Requirements of IATF 16949:2016

Trainer's Guide

Overview

This course is designed to train employees on the requirements of IATF 16949:2016. The course covers the structure, emphasis and requirements of the standard.

The course is approximately two hours long; the length may be changed by covering less detail, or by adding the suggested group exercises.

To begin preparing for the training session:

- Print the Notes pages of the PowerPoint presentation. (Open the PowerPoint presentation, select “Print”, and select “Notes Pages”).
- Print a copy of the Student Manual. You will then be able to prepare for the presentation using this guide and reviewing the speaker notes and student manual.

The content of the student manual matches the information in the PowerPoint slides. Let students know this at the beginning of the presentation to make it easier for them to take notes. The speaker notes provide additional detail.

You will need one copy of the standard for the trainer, and you may want copies for each student to refer to for details. Standards are available electronically from:
<http://16949store.com/buy-standards/>

Introduction

IATF 16949:2016 is the latest standard for Quality Management Systems Requirements for Automotive Production and Relevant Service Parts Organizations.

The previous version was the Technical Specification ISO/TS 16949:2009.

Both the 2016 and 2009 Standards include the requirements of ISO 9001:2015 and ISO 9001:2008 respectively.

In this presentation, the text of the Standard is paraphrased and expressed as directives for instructional purposes.

Refer to the standards for the actual text.

The IATF 16949:2016 standard has proven to be a most popular and effective way for companies to manage their Quality Management System (QMS)

The International Automotive Standard IATF 16949:2016 is restructured and contains 10 sections or clauses numbered 1 through 10.

It is important to note that the standard is revised to incorporate the new clause structure and content of ISO 9001:2015.

Also, new automotive industry requirements, definitions, and notes are included.

Topics Covered			
1. Fundamentals	2. Basics of a QMS and IATF 16949	3. IATF 16949:2016 Requirements	4. Managing the IATF 16949 QMS
<ul style="list-style-type: none">• Who is IATF?• What is a Management System?• Plan Do Check Act• Process approach• Risk Based Thinking	<ul style="list-style-type: none">• What is a QMS?• What is ISO 9001?• Benefits of certification• Elements of ISO 9001:2015	<ul style="list-style-type: none">• Key Elements• Documenting your QMS• Implementing the QMS in your company• Training People• Auditing the QMS• Certification	<ul style="list-style-type: none">• Key elements of an IATF 16949 QMS• IATF 16949 registration

Copyright ©2016 16949Store.com 3

Today we will cover the following topics so that you will better understand your company's Quality Management System.

I will begin by providing some basic information regarding management systems and the IATF standard.

I will then explain:

What is a QMS and What is IATF 16949

Why is it important to your company to achieve IATF 16949 registration

What are the benefits of achieving registration

What are the elements necessary to establish and manage and IATF 16949 QMS, and

How can you support your company's QMS.

For the rest of the training, we will use the term QMS which means the Quality Management System.

INSERT COMPANY NAME/LOGO HERE

IATF 16949:2016 Automotive Quality Management Systems - The Internal Audit Checklist

This checklist is based on the information provided in the Oct 1, 2016 1st edition of the IATF 16949:2016 international automotive standard. The checklist is best used by trained and practicing auditors to evaluate or assess Quality Management Systems requirements based on the standard. You will see questions on the checklist that refer to the standard and for each clause provisions are made for additional questions.

The auditors are expected to keep in mind that the standard does not require mandatory procedures for the various QMS processes; however, the auditors will expect documented information to be available because in the clauses of the standard, the phrase such as 'documented procedures' is used to specify that a process, a method, a system, a work instruction, or an arrangement, be documented.

The auditors must use a great deal of discretion and therefore must be careful and thoughtful prior to establishing a deficiency against a requirement. Evidence for visible top management leadership, commitment and quality management action must be looked for.

The **bold** numbers and titles used in the first two columns of the checklist indicate the "Requirements" and may be referred to on nonconformity reports prepared by the auditor.

During the assessment of each requirement, auditors record the status of the evaluation by indicating in the right-hand column a

Yes - for Acceptable Condition or **No** - for Deficient Condition

---	QUALITY MANAGEMENT SYSTEM	OBSERVATIONS	STATUS
4	CONTEXT OF THE ORGANIZATION		
4.1	Understanding the organization and its context		
	Has your company determined the external and internal issues that are relevant to your purpose and strategic direction? Have you considered the relevant issues that affect your ability to achieve the intended results of the Quality Management System (QMS)? How do you monitor and review the information related to the external and internal issues?		

INSERT COMPANY NAME/LOGO HERE

	Additional Questions		
4.2	Understanding the organization and its context		
	<p>With consideration given to their impact or potential impact on your company's ability to consistently provide products and services that meet customer and applicable statutory and regulatory requirements, have you determined:</p> <ul style="list-style-type: none"> • The interested parties relevant to the QMS? • The requirements of these interested parties that are relevant to the QMS? <p>How do you monitor and review the information about the interested parties and their relevant requirements?</p>		
	Additional Questions		
4.3	Determining the scope of the quality management system		
	<p>To establish the scope of the QMS, has your company determined the boundaries and applicability of the QMS?</p> <p>When determining the scope of the QMS, have you considered the:</p> <ul style="list-style-type: none"> • External and internal issues (per 4.1)? • Requirements of relevant interested parties (per 4.2)? 		

INSERT COMPANY NAME/LOGO HERE

IATF 16949:2016 Automotive Quality Management Systems - The Internal Audit Checklist

	<ul style="list-style-type: none"> • Products and services covered by the QMS? 		
	<p>When a requirement of ISO 9001:2015 can be applied, has your company applied it (see also clause 4.3.1 below)?</p> <p>When requirements cannot be applied, and to claim conformity to ISO 9001:2015, how do you determine if your ability or responsibility to ensure conformity of products and services are not affected?</p> <p>Has your company provided justification for any instance where a requirement of the standard cannot be applied?</p> <p>Is the scope of the QMS available and maintained as documented information?</p>		
	Additional Questions		
4.3.1	Determining the scope of the quality management system - supplemental		
	When determining the scope of the QMS, are the supporting on-site or off-site functions, such as design centers, corporate headquarters, and distribution centers, included in the QMS scope?		
	<ul style="list-style-type: none"> • In determining the scope of the QMS, have you considered product design and development (per clause 8.3) as the only permitted exclusion? • If applicable, is this exclusion justified and maintained as documented information? • Do you recognize that permitted exclusions do not include manufacturing process design? 		

ISO 9001:2015 to IATF 16949:2016 - QMS Transition Checklist

IATF 16949:2016 Clause	Changes to the existing ISO 9001:2015 Quality System	Reference document	Changes in existing documentation	Upgrade Checklist	
				Assigned to:	Date Completed
All	The International Automotive Standard IATF 16949:2016 is restructured and contains 10 sections or clauses numbered 1 through 10. It is important to note that the standard is revised to incorporate the new clause structure and content of ISO 9001:2015. Also, new automotive industry requirements, definitions, and notes are included.	IATF 16949:2016	The requirement clauses of the new standard are the Clause 4 through Clause 10. Your company needs to become familiar with the new structure and the changes and subsequently upgrade the Quality Management System (QMS). Your company now has an opportunity to review the exiting ISO 9001:2015 QMS and improve the system while incorporating the IATF 16949:2016 requirements.		
All	While the specific requirement for a quality manual is not in ISO 9001:2015, the new standard requires a Quality Manual as part of the Documented Information be maintained for the QMS.	Manual	For an existing quality manual, review / rework / update your document into a condensed version that will introduce the new quality system or if a manual is not available, prepare a new Quality Manual.		
---	The format and structure of the quality manual is at your discretion and will depend on the size, culture, and complexity of your company, see also clause 7.5.1.1.	Manual	In the condensed manual include sections for: <ul style="list-style-type: none"> • Scope of the Quality Management System (QMS) • Distribution Control List, • Revision Status, • Quality Policy and Objective, Strategic Direction, Corporate Policies • Organization Chart, • Company Background - Products and Services, • Process Flow Diagram, • List of Documented Information, • Records Documentation Matrix. 		
---	The specific requirement for documented procedures is not in IATF 16949; however documented information is required to plan, establish, implement, and maintain the QMS processes.	Documented information	The QMS documented information may be presented in any suitable format such as in a method, an instruction, a system, a process, a procedure, a manual, etc. You will need to add / replace / rework your QMS		

ISO 9001:2015 to IATF 16949:2016 - QMS Transition Checklist

			procedures to incorporate the IATF requirements. An early consideration is the development of a process for the control of documented information. Replace / rework the documented procedures for Control of Documents and Control of Records with a procedure, (such as P-750) for Documented Information and include it in section 7.5.		
4	<p>For ISO 9001:2015, this clause introduces two sub-clauses relating to the context of the organization, (1) understanding the organization and its context and (2) understanding the needs and expectations of interested parties. Together they require that you determine the issues and requirements that can impact on the planning of the QMS. In addition, the scope of the QMS and the QMS processes along with their applicability and interactions need to be determined.</p> <p>For IATF 16949:2016, sections are introduced to supplement requirements for the scope of the QMS, customer specific requirements, conformance of products and processes, and product safety.</p>				
4	Clause 4, Context of the Organization is a requirement in IATF 16949:2016.	Documented information	Your company must determine the issues and requirements that can impact on the planning of the QMS and that can affect the ability to achieve the intended results of the QMS. For typical guidance, see procedure P-400 for Organizational context and worksheet, F-440-002 to identify issues and requirements.		
4.1	Documented information for the QMS sets the stage for an understanding of the requirements and of the international standard.	Procedure	Review and document the information (in a document P-400, Organizational Context) that outlines the process to understand and determine the internal and external issues that are relevant to the QMS.		
4.2	A stakeholder approach provides for an understanding of the requirements of interested parties.		Include (in a document P-400) the process to understand and determine the needs and expectations of interested parties.		
4.3	Clause 4.3 covers the requirement for the scope of the QMS.		Include P-400, the process to determine the scope of the QMS. Refer to 4.3 a) thru c) and consider the internal and external issues, the requirements of interested parties, and your products and services.		
	For IATF 16949, the requirements for		Include in the scope of the QMS, the supporting on-		

ISO 9001:2015 to IATF 16949:2016 - QMS Transition Checklist

4.3.1	determining the scope of the QMS are supplemented.		site or off-site functions, such as design centers, corporate headquarters, and distribution centers.		
4.3.1	For IATF 16949, an exclusion is only permitted for clause 8.3, design and development of products.		If your company does not design and develop products or services, include justification for the exclusion of clause 8.3. Note that conformity to IATF 16949 can only be claimed if the exclusion does not affect your ability or responsibility to meet product and service requirements and enhance customer satisfaction.		
4.3.2	For IATF 16949, customer specific requirements are included in the scope of the QMS.		Evaluate customer-specific requirements and include them in the scope of the QMS.		
4.4	Clause 4.4 covers the requirements for the QMS and its processes.		Your company must establish, implement, maintain, and continually improve the QMS.		
4.4.1	Clause 4.4.1 covers the requirements for the QMS and its processes.		Provide an outline (in a document P-400) of the process to determine the application and interaction of the processes needed for the QMS. As you proceed through the upgrade of the QMS, consider the use of the QMS process identification worksheet F-440-001 to determine the inputs required and the outputs expected from processes. Address risks and opportunities and plan to implement actions to address them. See clause 6.1.		
4.4.1.1	For IATF 16949, conformance of products and processes is assured.		In P-400, provide an outline of the process to ensure conformance of all products and processes, including service parts, outsourced parts, customer, statutory, and regulatory requirements.		
4.4.1.2	For IATF 16949, a documented process to manage product safety is required.		In P-400, include the process to manage product safety related products and processes. In product safety worksheet, F-440-003 consider items 4.4.1.2 a) thru m).		
4.4.2	Documented information that supports the processes are maintained and retained.		Document (in a P-400) the process to establish and maintain the documented information to support the operation of the processes and retained to provide		

ISO 9001:2015 to IATF 16949:2016 - QMS Transition Checklist

			the confidence that the processes are carried out as planned. See Documented information, clause 7.5. Outline (in a document P-750) the process for the control of documented information.		
5	<p>For ISO 9001:2015, this clause requires that your top management demonstrates leadership and commitment with respect to the QMS and to customer focus. This section also asks top management to establish, implement and maintain a quality policy that is appropriate to your company and to ensure that the responsibilities and authorities for relevant roles are assigned, communicated, and understood.</p> <p>For IATF 16949:2016, sections are introduced to supplement requirements for corporate responsibility, process effectiveness and efficiency, process owners, organizational roles, responsibilities & authorities, and responsibility and authority for product requirements and corrective actions.</p>				
5	Clause 5, Leadership is a requirement in IATF 16949:2016.	Procedure	Review and re-write your existing document (such as P-500) to incorporate the revised requirements for leadership and commitment.		
5.1	Clause 5.1 covers the requirements for leadership and commitment.		Include the actions to demonstrate the leadership and commitment to the QMS. Refer to specific requirements in clause 5.1.1 and include the requirements for a) thru j)		
5.1.1.1	For IATF 16949, corporate responsibility policies are defined and implemented.		In P-500, define the corporate responsibility policies, for anti-bribery policy, employee code of conduct, and whistle-blowing policy to be implemented.		
5.1.1.2	For IATF 16949, product realization processes are reviewed and evaluated for effectiveness.		In P-500, include the review and evaluation of processes to improve their effectiveness and efficiency.		
5.1.1.3	For IATF 16949, process owners are identified.		In P-500, identify the process owners who are responsible for managing the processes and related outputs.		
5.1.2	Clause 5.1.2 covers the requirements for customer focus.		Include the actions to demonstrate the leadership and commitment to customer focus. Refer to 5.1.2 a) thru c) requirements dealing with meeting customer and regulatory requirements, addressing risks and opportunities, and customer satisfaction.		
5.2	Clause 5.2 covers the quality policy.		Include the process for developing a quality policy that is appropriate to the purpose and context of your company and communicating this quality policy.
